HASHICORP VAULT

3-Day Training: HashiCorp Vault

Table of Contents — Secrets Management, Dynamic Secrets, PKI & Enterprise Operations

DAY 1 Foundations & Core Secrets Engines

1. Introduction to Secrets Management & Why Vault
2. Vault Architecture — Storage Backend, Barrier, Seal/Unseal, Shamir's Secret Sharing
3. Installation & Setup — Dev Mode vs Production Mode
4. Vault CLI, API, and UI Walkthrough
5. Authentication Methods Overview — Token, Userpass, LDAP
6. KV Secrets Engine — v1 vs v2, Versioning
7. **Hands-on Lab:** Deploy Vault, Unseal, Write/Read Secrets

DAY 2 Dynamic Secrets, Auth & Policies

1. Dynamic Secrets Engines — Database, AWS, Azure
2. Policies & Access Control — ACL Syntax, Least Privilege
3. Auth Methods Deep Dive — AppRole, Kubernetes, JWT/OIDC
4. Leases, Renewal & Revocation
5. Response Wrapping & Cubbyhole
6. **Hands-on Lab:** Configure DB Secrets Engine + AppRole Auth + Policy Enforcement

DAY 3 PKI, Transit, Enterprise & Operations

1. PKI Secrets Engine — Root/Intermediate CA, Certificate Issuance
2. Transit Secrets Engine — Encryption as a Service
3. Auto-Unseal (Cloud KMS Integration) & Seal Wrapping
4. Vault Agent & Vault Agent Templating
5. High Availability, Replication (Enterprise), Disaster Recovery
6. Monitoring, Audit Devices & Best Practices
7. **Capstone Lab:** End-to-End Scenario Integrating PKI + Transit + Vault Agent
